

The Breckenridge Series Vent-Free Gas Fireboxes Deluxe, Premium, and Select

Breckenridge Premium 36 Firebox with Charred Oak Log Set,
Mission Louvers and Doors installed in an Oak Standard Mantel.

White Mountain Hearth – The Pinnacle of Efficiency

Breckenridge Deluxe, Premium, and Select Models

Available in 32-inch, 36-inch, and 42-inch

Standard Features

The Breckenridge Vent-Free Fireboxes now offer more sizes and configurations than ever.

Available in louvered and flush front, the Breckenridge Deluxe and the deeper Premium models present the updated look of a traditional recirculating firebox.

Our unique Breckenridge Select vent-free gas firebox features a tall, deep stage for the log set, yet has compact outer dimensions and low profile top and bottom. The visual effect is a lot more fireplace with less of the firebox face showing.

The unique Breckenridge Select has no lower louvers, allowing it to be installed at floor level, yet still provide the benefit of a recirculating firebox with optional blower.

The low floor height allows installation at or near floor level, for a natural, integrated look, that creates the illusion of a site-built fireplace – but at a fraction of the cost.

All our new fireboxes feature hem-bent seams that provide a better seal while eliminating dozens of screws and fasteners. The result is a lighter, more rigid box that's easier to install.

Breckenridge 32 Premium in Standard Corner Cabinet Mantel (shown in Cherry) with Polished Brass Slat Louvers, Decorative Frame, Arched Doors, Hood and Outer Frame.

Breckenridge 32 Vent-Free Louvered Firebox

Breckenridge 36 Vent-Free Flush Firebox

Breckenridge 42 Vent-Free Select Firebox

- **Zero Clearance Certified**

Mantels

Surround your Breckenridge firebox with our Standard Cabinet Mantel or Corner Cabinet Mantel beautifully hand finished in cherry, dark oak, light oak, or white. Or select unfinished hardwood or oak and stain or paint your new mantel to match your home's other woodwork.

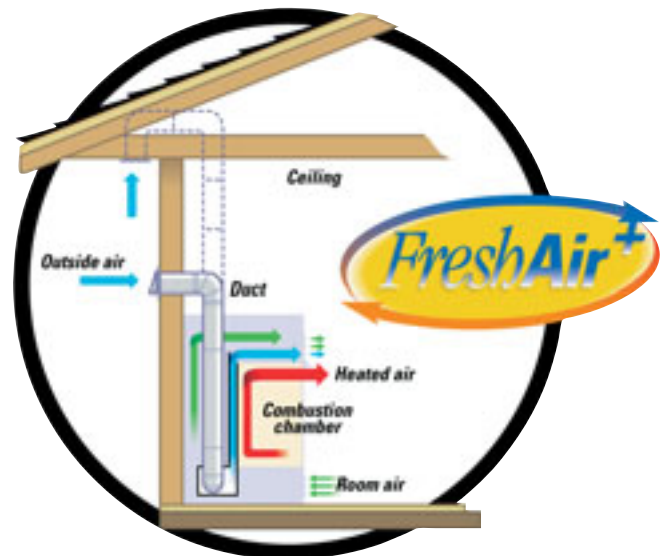

Ask your dealer about Universal Mantels from White Mountain Hearth. Universal Mantels are available in cabinet, corner cabinet, and flush models. They are larger overall than our Traditional Mantels, can be ordered with or without a full-width base, and can be used with mantel laminate surrounds from White Mountain Hearth or stone surrounds supplied by your dealer.

Empire's craftsmen (and women) build each mantel from 3/4-inch fine-furniture grade cabinetry components, including MDF wrapped in select hardwood veneers. Because this natural wood can vary in appearance, we grain match the components for each mantel to ensure that your mantel looks great.

Each mantel is detailed in matching solid wood trim – in oak or poplar. The full 3/4-inch moldings and edge trim add beauty and structural integrity.

For custom installations, the Breckenridge firebox lets you cover the top and bottom panels (Flush Front) with non-combustible building materials, yet still enjoy the added warmth of the optional built-in single-speed blower. Shown with optional extended hood.

The optional FreshAir+ System, for Deluxe and Premium Fireboxes only, blends warmed air with incoming outside air to continuously freshen your indoor air.

Options & Accessories

More than 200 easily installed decorative accessories for the Breckenridge let you tailor your firebox to your décor.

Choose louvers in four patterns – slat, arched, leaf, and mission – finished in matte black, hammered pewter, polished brass, or brushed stainless steel.

Matching door sets and frames complete the transformation from an attractive fireplace to a stunning focal point.

Our ceramic fiber liners give your new firebox the look of a real masonry fireplace. On Deluxe and Premium fireboxes, choose our Traditional liner with light-color bricks or the Aged Brick liner with deep, rich red tones and hand-painted heat and smoke residue. Our Select fireboxes include a ceramic fiber liner in a Herringbone Brick pattern with lighter color bricks that complement the large opening.

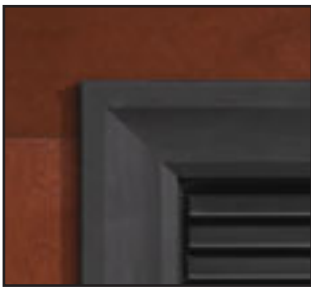

The optional automatic blower circulates the warm air throughout the room, and the optional variable-speed control lets you adjust the fan speed.

Outer Frames and Bottom Trim

Our metal three-piece outer frames let you transition from your fireplace to any adjoining surface – wooden mantel, tile, stone, or any noncombustible material. Choose from steel frames – with traditional crisp lines – or our new extruded aluminum frames – with a profile that combines gentle concaves with flat surfaces. Each is available in matte black, hammered pewter, polished brass, and stainless steel finish.

Our new bottom trim completes the fourth side of the color frame.

Extruded Aluminum Frames

Matte Black
(Shown on Cherry Mantel)

Polished Brass
(Shown on Dark Oak Mantel)

Hammered Pewter
(Shown on Oak Mantel)

Stainless Steel
(Shown on White Mantel)

History & Art Come Together

Empire Comfort Systems Inc. has manufactured safe, reliable heating systems for 75 years. We take pride in our reputation for quality products, backed by the best sales, service, and distribution network in this industry. The White Mountain Hearth Series combines our proven technologies with exceptional artistry and craftsmanship to add beauty and warmth to any home.

and Contour Burner Combination (VFDR-24)

Refractory Aged Oak Log Set (LS-24RA0)
with Slope Glaze Burner System (VFSR-24)

See complete log specifications in the [White Mountain Hearth Log Brochure](#)

Log Sets and Burners

The hand-painted ceramic fiber and refractory log sets complement the flames from our Slope Glaze Burner.

At 99.9 percent efficient, the Vent-Free Slope Glaze Burner delivers more heat for your energy dollars. Ceramic glazed pellets in the burner tumble and swirl the gas to produce a natural flickering flame.

Step up to a Remote-Ready Burner and select our battery operated Thermostat Remote Control. Our Thermostat Remote automatically cycles the burner on and off to maintain your ideal room temperature.

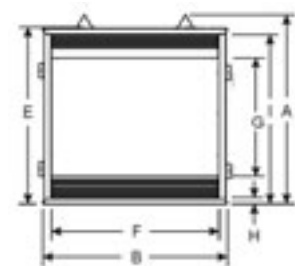

Burners are also available with manual controls or with millivolt controls that can connect to a simple wall switch, one of four wall thermostats, or a remote control. There's even a wireless wall thermostat that simplifies installation.

Mantels available in cherry, dark oak, oak, white, unfinished hardwood, and unfinished oak.

Vent-Free appliances may be installed in an aftermarket (mobile) home where not prohibited by state or local codes. The approval (G1-0504-90B) has been granted subject to the installation in compliance with CMR 248, 527 CMR 30, Massachusetts State Plumbing Code and/or the Massachusetts Fuel Gas Code.

Empire Comfort Systems is committed to continuous product improvement; specifications are subject to change without notice. Flame size, shape, and color will vary from photos. Our mantels feature natural veneers and hand-rubbed finishes - wood grain and color will vary. Adjust light levels and use "natural light" incandescent bulbs to enhance the dramatic look for your wooden mantel.
